Subject: FIDE Congress 2004 - Agenda

Dear Colleagues,

Please include this in the Agenda.

Proposal for Chess Olympiads.

To give priority to Match Points; using Match Points for Pairings and for deciding Final Ranking.

Henceforth, Game Points shall be one of the variations in a tie-break.

If approved, then the Swiss Pairings for Olympiads will be amended accordingly; in treating a score group, the ranking of the teams will use Game Points instead of Buhholz.

I have proposed the above but although included in the agenda, the topic had been referred to the Technical Commission but without follow-up decision.

With Best Wishes
Ignatius Leong
